Just saw your note about missing the meeting on Friday. Are you in all of next week, at least as far as you know right now?

Thanks!

I've reviewed the table, in case I was speaking too much off the cuff earlier today. **Ex. 5 Deliberative Process (DP)**

Dear all,

Just a clarification in addition to Margaret's note yesterday. Pending confirmation by Margaret, in the disposition summaries it will be helpful to flag when there is no suitable BaP data in addition to the other flags. In particular, several cases of studies with no tumor incidence for a PAH would seem to lead to a 0 RPF to be averaged with other RPFs, when it's really the lack of BaP data that determines no further work for these. At least through PAH #6, if I'm not misunderstanding anything.

Still good to flag the lack of response; we will characterize where needed whether or not the PAH dose was high enough to see a response given the designs for these studies.

Thanks,
Karen
